

### Natural Remedy for Toothache

Toothache which is pain in the jaw is usually because of the inflammation of the pulp of the tooth (pulpitis). Cold, heat or pressure on the tooth may increase the pain. Sometimes a toothache may be due to non-dental reasons like infection of the ears and sinus. **Causes:**

- Toothache can also be caused by a broken or fractured tooth without any cavity.
- Dental Cavities.
- Expose tooth roots.
- Cracked Tooth Syndrome.
- Gum disease.
- Improper brushing.

#### Symptoms:

- Toothache.
- Bleeding from gum.

#### Diagnosis:

- Dentists can run a differential diagnosis to find out the major causes of the toothache. The differential diagnosis involves a histological analysis of the affected tooth and the surrounding gums and tissues. The exposed pulp may be analyzed to find out the bacterial destruction of the tooth. The dentist may diagnose that periapical tissue inflammation is the real cause of toothache.

#### Ingredients:

1. Indian abutilon leaves.
2. Alum.

#### Natural Remedies:

- Abutilon Indicum is sweet in taste and has cooling, digestive, laxative, expectorant, diuretic, astringent, analgesic, anti-inflammatory, anthelmintic, demulcent and aphrodisiac properties.
- Alum The specific compound is the hydrated potassium aluminium sulfate (Potassium alum). Alum in block form (usually potassium alum) is used as a blood coagulant. Styptic pencils containing aluminium sulfate or potassium aluminium sulfate are used as astringents to prevent bleeding from small shaving cuts. Alum was used as a base in skin whiteners and treatments during the late 16th

## Granny Therapy

---

century.

Take some Indian abutilon leaves. Add some alum pieces. Grind it. Mix with water. Then wash out your mouth.
